## PROFESSIONAL SUMMARY

Dedicated and passionate **Software Engineering undergraduate** (4th Semester) at Mirpur University of Science and Technology (MUST) with hands-on experience in **C#, C++, Python, SQL, OOP, and DSA**. Proven ability to design and develop real-world console-based applications and web projects each semester. Active member of **Microsoft Learn Student Ambassadors (MLSA)** with strong problem-solving, teamwork, and communication skills. Seeking opportunities to apply technical expertise, gain industry exposure, and grow as a software professional in a dynamic and challenging environment.

## EDUCATION

### Mirpur University of Science & Technology (MUST)

Bachelor of Science in Software Engineering

2024 – 2028

### Government Model Science College

Higher Secondary School Certificate (Fsc Pre-Medical)

2022 – 2024

### Army Public School (APSACS)

Secondary School Certificate (Matriculation – Science)

2020 – 2022

## TECHNICAL SKILLS

**Programming Languages:** C#, C++, Python

**Database Technologies:** MySQL, SQL Server

**Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Software Development Life Cycle (SDLC)

**Developer Tools:** Visual Studio, Visual Studio Code (VS Code), Git, GitHub

**Soft Skills:** Team Management, Communication, Problem-Solving, Critical Thinking, Fast Learning

## PROJECTS

### Student Management System | C#, OOP,

- Built a console-based application to manage student records, enrollment, courses, and grade tracking.
- Applied OOP principles include encapsulation, inheritance, and polymorphism for clean architecture.

### Inventory Management System | C#, OOP,

- Developed a console-based inventory system to track products, stock levels, purchases, and sales.
- Designed modular code using OOP concepts to ensure reusability and maintainability.

### Space Management System | SQL, SQL Server, Database Design

- Created a console-based space allocation and management system with structured SQL database design.
- Designed normalized database schema for efficient space record management.
- Implemented search, allocation, and reporting features using SQL queries.

### Grocery Management System | C++, DSA

- Built a console-based grocery management app applying Data Structures like arrays, linked lists, and sorting algorithms.
- Implemented efficient search and filter functionality for grocery items using DSA concepts.

### Quiz Game | C#, OOP

- Developed an interactive console-based quiz application with multiple-choice questions and real-time score tracking.
- Utilized OOP design patterns for question management, user sessions, and result calculation.

### Social Media Downloader | Python,

- Built a Python-based tool to download media content from social platforms using public APIs.
- Implemented error handling, user input validation, and file management features.

## MEMBERSHIPS & ACHIEVEMENTS

### Microsoft Learn Student Ambassadors (MLSA)

Active Student Member

MUST, Mirpur

2024 – Present

- Member of Microsoft's global student community at MUST, focused on technology learning, community building, and skill development.

MEMBERSHIPS & ACHIEVEMENTS

---

**Microsoft Learn Student Ambassadors (MLSA)**

MUST, Mirpur

*Active Student Member*

*2024 – Present*

- Member of Microsoft’s global student community at MUST, focused on technology learning, community building, and skill development.
- Engaged in Microsoft-sponsored learning paths, workshops, and peer collaboration events.

RELEVANT COURSEWORK

---

Programming Fundamentals (C++)

Object-Oriented Programming (C#)

Data Structures & Algorithms

Database Systems (SQL, MySQL)

Discrete Mathematics

Computer Organization & Architecture
